Ice Cream Facts & Figures

Ice cream is such a favorite food for people of all ages that America produces nearly 900 million gallons of it every year. That's about 15 quarts per year per person.

* * *

A favorite place to get ice cream for many people is at home. A unique home ice-cream machine now can give you two flavors at the same time. This Lickety-Split from Norelco also makes frozen yogurt, sherbet and ice milk by using table salt and ice.

* * *

You can make so many great flavors with such a machine that you may want to challenge the ice-cream-eating record set by Ken Redding in 1976, when he lapped up 11 pounds of the tasty treat in only 8 minutes, 15 seconds.
